

# BYO

## BRING YOUR OWN

Single-use plastics like bottles, straws, bags, and utensils stick around long after you use them, breaking down into microplastics. In fact, the average person ingests about a credit card's worth of plastic each week.

Additionally, 99% of plastic comes from fossil fuels, one of the biggest contributors to the climate crisis.

350 Brooklyn is a local grassroots affiliate of 350.org, dedicated to reversing climate change and achieving climate justice through local action. **Go to [350brooklyn.org](https://350brooklyn.org) for details on how to join the fight— and see you at our next monthly meeting!**
